### Water Tube Boilers

Trust us to find the right solution for your manufacturing needs.

### Simple Vertical Boiler

Growth and Specialization The biggest change in boiler design came with the development of the membrane tube wall in the late 1950s and early 1960s. The had a steam drum connected at either end by downcomers with two horizontal water drums. The firebox is slightly tapered towards the top to allow the ready passage of the steam to the surface.
