## Kid's Books

During 2017-2018, for example, 188 deaths in children were reported to CDC but statistical modeling suggests approximately 600 deaths may have occurred. Symptoms and Treatment Flu symptoms include fever, cough, sore throat, runny or stuffy nose, body aches, headache, and fatigue. This will ensure that your child is protected before flu starts circulating in your community.

## Sponsor a Child in Need

They would be the first Black First Family in the White House and serve the country for two terms. The average age of a child in foster care is more than 8 years old, and there are slightly more boys than girls. In contemporary English, kid is neither slang nor improper.

## Kid's Books

Types of flu vaccines for children During the current flu season, CDC recommends annual influenza vaccination for everyone 6 months and older with any licensed, age-appropriate flu vaccine. While seasonal flu outbreaks can happen as early as October, during most seasons flu activity peaks between December and February. To ensure delivery of Save the Children emails to your inbox, add support savechildren.

## Flu & Young Children

A flu shot given during pregnancy has been shown to not only protect the mother from flu, but also to help protect the baby from flu infection for several months after birth, before he or she is old enough to be vaccinated.
