Exploring the Solar System: A History with 22 Activities by Mary Kay Carson

Just sketch Venus's shape night after night and see how it changes phases.

Exploring the Solar System: A History with 22 Activities [For Kids series], Car

Many believed that the wanderers were gods moving back and forth as they went about their heavenly business.

Exploring the Solar System: A History with 22 Activities [For Kids series], Car

Now push the other pushpin somewhere on the horizontal line you drew.

Exploring the Solar System: A History with 22 Activities [For Kids series], Car

Filesize: 20.52 MB

During the 1660s Isaac Newton discovered that sunlight is actually made up of many colors of light. It was time to begin exploring the nature of the planets themselves — up close.

Table of contents for Exploring the solar system for kids

REASON BEHIND MOTION When the plague hit Cambridge, England, in 1665, Isaac Newton decided to leave town. At 45 years of age, Galileo Galilei set out to build such an instrument himself. This changing view allows us to use the constellations as a kind of calendar.
