### Rhum gasfield

The original partners in the Rhum field were BP Operator 50% and Iranian Oil Company U. At the same time, the absence of energy-generation equipment on platforms will reduce topside weight and manpower requirements, as well as noise and vibration. Beyond the size and scale, the appropriately named Hope also sees an opportunity.

### Proposed Demerger of the UK Continental Shelf oil & gas assets of Petrofac Energy Developments to create EnQuest PLC

Established in 2017 by a trio of industry executives including Alasdair Locke, who made a fortune from the sale of Abbot, his oil and gas services business, WSS has also received funding from Scottish Enterprise.

### Gloomy year projected for North Sea amid record

During 2019 Equinor will use the West Phoenix drilling rig to drill the Lifjellet prospect in license P2378, with partner Shell.

### Equinor begins UK drilling campaign Equinor begins UK drilling campaign

The UK oil and gas supply chain services domestic activities and exports about £12 billion of goods and services to the rest of the world. In the UK, a record low of five wells were drilled in 2020, resulting in two commercial discoveries — Looking ahead to 2021, Westwood Global has pinpointed 12 UKCS wells that could be completed. Here you will find links to various well data held by the OGA.

### Well slot: Active wells and completions in Westwood report to month end

Whilst the oil and gas industry provides work across the whole of the UK, Scotland benefits the most, with around 195,000 jobs, or 44% of the total.

### The Electrification Of UK Offshore Oil & Gas

The Secret History of the Blitz. The UK Continental Shelf continues to benefit from an extensive installed infrastructure base and skilled labour to

develop, operate and manage assets.

#### **Oil and Gas Authority: Well data**

In 2020, it is estimated that 70% of primary energy consumed in the UK will still come from oil and gas, even upon achievement of the government's target to source 20% of energy from renewable sources. During the Covid-19 outbreak, Petrobras and other oil companies shifted focus from their own projects onto divesting in ancillary projects, which helped reduce their expenses while generating income for the sale of such non-core assets.
