But that will require far more consideration of these issues than we have yet given them.

### Bioethics Problems for 2020 to 2040: Emerging Ethical Challenges in Critical Care for the 21st Century

The new technologies for human reproduction constitute a violence against women whose bodies are used as laboratories and as new fields for experimentation. We must also, however, refuse to accept the premise that whatever human beings can do scientifically should be done, especially if the identity of the human species is at stake.

### **The Ethics of a Brave New World: A Response to ‘Baby**

To the extent that we come to accept as normal what is in fact perverse, we shall have lost the ability to see how we have been diminished. Those in attendance left the conference with a sense that priests must not only be versed in theology, but should stay abreast of the most recent scientific discoveries. Third, we must preserve the integrity of human language.
