## Special Protection Areas

Israel: an international axis of raptor migration. Despite not being known predators of buzzards, other large, vole-eating owls are known to displace or to be avoided by nesting buzzards, such as *Strix nebulosa* and *Strix uralensis*. © 2018 National Audubon Society, Inc.

## UK BAP List of UK Priority Species

This race has traditionally been listed as a resident race, but some sources consider it a migrant to eastern and southern Africa. Buzzards were the most frequent predator in a study of juvenile pheasants in England, accounting for 4. De takkeling, 20 2 , 133—144.

## Birds of the Sierra Nevada: Their Natural History, Status, and Distribution

Cocks and cockerels are also estimated separately, and are 4. The identity, origin and impact of a 'new' buzzard species breeding in South Africa Doctoral dissertation, University of Cape Town. A new study has revealed that a quarter of British bird biomass annually is contributed by non-native and.

## Non

Much larger raptors are known to have killed a few buzzards as well, including *Aquila nipalensis* on migrating steppe buzzards in. The distinguishing characters of the Steppe-Buzzard.

## Ken Rosenberg

More serious identification concerns lie in other *Buteo* species and in flight with , which are quite different looking when seen perched at close range.

## Northern Prairie Wildlife Research Center

In the of the , the average density was estimated as 23 pairs per 100 km<sup>2</sup> 39 sq mi , similar to that of a middling continental population. The only

sparing factor is the temporal difference the buzzard nesting later in the year than the eagle-owl and buzzards may locally be able to avoid nesting near an active eagle-owl family.

### **Northern Prairie Wildlife Research Center**

This highly individually variable race is described below.

### **The Carolina Bird Club**

Additionally, since there is a long history of preserving birds for museum specimens, scientists can examine them to determine environmental pollution in the past. Ornithological notes from Northern Norway, 54 Schreiner, S.
