Math Jam and Self

Solve equations developed from number, geometry, proportion, and percent applications. Construct code that will perform vector arithmetic and normalization. Perform binomial expansions through pattern recognition and use of the binomial theorem

Mathematical Sciences

Use optimization techniques in economics, the physical sciences and geometry. Distinguish between data from an observational study and data from a designed experiment.

Mathematics for Management: A Self

It is designed to involve the students with the concepts as well as quantitative skills. Graph solution sets for systems of non-linear inequalities.

Mathematics for Management: A Self

This course is the first of a two-semester sequence that will introduce the mathematical skills and concepts necessary in technical work. Although some courses will have online materials, self-paced courses are usually not Internet courses.

Mathematics for Management: A Self

Express numbers in scientific notation. Description: This course is the second of a two-semester sequence on the mathematical skills and concepts necessary in technical work.

Business Math (PR): Self

Determine election winners and rankings.

Mathematical Sciences

If you would like to know more information about Self-paced math, please log-in to Zoom during the class hours listed above. Use technology and the Internet to enhance classroom lessons, collaborate, and communicate. Find combinations and compositions of functions represented using a description, a table of values, a graph or a formula.

Business Math (PR): Self

Asynchronous The most common form of distance learning. Determine the terms of a sequence, both explicitly and recursively.
