But this assumption often blinds us to the fact that small countries also seek to acquire and exploit power. This statement reflects an understanding that Canadian security, including economic security, is increasingly dependent on the security of other countries and regions. These issues are best addressed in a multilateral forum, as non-traditional security threats may have a better chance of being successfully worked out there.

Chapter 6 :Asia Pacific Security Issues

Both have urban concentrations on delta plains and, as a consequence, millions of people might be displaced by a rise in sea level. This program should be preserved.

In what kind of situations can such countries give the impression of playing on the same stage as the major powers? These types of small-scale disputes could have the potential to escalate into much larger conflicts.

The Architecture of Security in the Asia

The depth and breadth of research provides a wide perspective on security problems in the Asia Pacific. The United States is the principal country to exert power in Asia Pacific. Dewitt drew the committees attention to on-going projects undertaken by the international security and intelligence community to develop ways for countries to protect themselves against these cross-border threats.
