Computer Supported Cooperative Work

The culture clash between postmodern HCI and formalism has always been stronger in the United States than elsewhere, and formal papers in computer-human interaction are rare. Because its use is so widespread, there are innumerable scenarios in the use of CSCL, but there are several common strategies that provide a foundation for group cognition. Perhaps they are most starkly presented here, however, because of the special richness of the information flows and broad scope of possible consequences.

Computer Supported Cooperative Work

Speed and performance improvements will collapse the time and distance that now separate people who could benefit from working together.
Whisler, HBR November—December 1958, p.

Distributed Multimedia Environment for Distance Learning

Our 30-year history of information technology use in organizations suggests that in the future managers must be much more actively involved in directing technology and managing its influence on organizations.

LEARNING FROM NOTES

In other words, electronic communication facilitates information sharing but can make consensus formation more difficult in time limited contexts. Tollmar, Konrad, Ovidiu Sandor, and Anna Schomer 1996. Such cross-cutting ties structure flows of information, coordination and other resources and help to integrate social systems.

Information Technology and Tomorrow's Manager

The interesting feature of a relation is its pattern: it has neither age, sex, religion, income, nor attitudes; although these may be attributes of the

individuals among whom the relation exists.... Those middle-management positions that remained would be more technical and specialized.

Communication Processes for Virtual Organizations

Losada, Marcial, Pedro Sanchez and Elizabeth E. Groupware encompasses those systems within the project and small group realms based on networks and including group decision support systems, workflow tools, and computer mediated communication tools and has origins in both organizational and individual systems and research.
