### How to Grow Wildflower from Seeds

Northerners will need to get creative; established broccoli is not tolerant of temperatures below 20 degrees.

### How To Grow Native Wildflowers From Seed

Growing--Remember that broccoli does not like extreme heat or cold; plants grow best between 65 and 80 degrees.

### Growing Weed from Seed

Kurstaki a naturally occurring bacterium that is organic-approved every 1-2 weeks.

### Growing Weed from Seed

This sun-loving asclepias grows well in dry, fast-draining soil and requires little supplemental water once established.

### How to get wildflower seeds

Store them in a cool, dry place. Female plants will be ready for pollination when their flower buds have almost reached maturity and they have grown long pistils.

### Home

From gigantic cannabis trees to outrageously massive harvests, growing cannabis outdoors is beyond rewarding. Grow beets like normal in the first year. Some sorghum varieties have been bred for grain, others for syrup.

### Guide to Wildflower Gardens

Results - how quickly do you want to see the fruits of your labour? This revised publication is directed primarily to the commercial production of

sunflower, not to marketing and processing. Each individual beet seed is, in fact, a cluster of several seeds; thinning will be necessary.
