## Extinction Threat To Monkeys And Other Primates Due To Habitat Loss, Hunting

The postorbital bar is a derived trait of primates, appearing in our earliest ancestors, which you will read more about in Chapter 8.

### Monkeys and Other Primates

Primates are found on all seven continents, although they are most successful in tropical and sub-tropical climates. One genetic estimate puts the origin of primates at approximately 91 million years ago mya , predating the extinction of the dinosaurs Bininda-Emonds et al.

### Monkeys and Other Primates

Social structure describes the relationships and interactions among group members. They learn social and fighting skills, often through playing.

### The Primates: Monkeys

The combines rodent-like teeth with a long, thin middle finger to fill the same ecological niche as a woodpecker.
