Oxford: Clarendon Press; New York: Oxford University Press. This arrangement results in the presence of the subject in two voices at once, the two not coinciding, but overlapping.

**Difference between canon and fugue?**

It was intended to be laid on a table which should serve two violinists as their deskone sitting at one side, the other opposite him, both reading from

the same paper as it appeared to him, and each playing every note on the page. Species Counterpoint Species Counterpoint is a specific tool used to help teach music students composition techniques. Composers like Mozart, Beethoven, Schubert and others took elements from counterpoint, and studied it in great detail , but used it in a different way to Bach - counterpoint became just one aspect of texture in a work, and it was much less likely to be used in a work as a whole.
