## Reference Services and Sources

Taylor Spring 1997 Description of course Application of standards and rules to the construction of catalogs in library and information environments.

## Taylor's Descriptive Syllabus

Reading the River: The State of the Art of Real-Time Virtual Reference.

## Evaluating Sources

Students' sense of support and community evolved from relationships with peers and faculty at the college and friendships developed in the larger university setting. Although independently related to overall college adjustment, interpersonal factors did not lead to a significant increase in variance explained in the dependent variable.

## Evaluating Sources

Studies have shown that informal programs can be equally as influential as formal methods that focus on academic and time management skills.
