Since 1907, students studying in Japan had established various medical and health journals, such as Health World and Journal of Chinese Medicine, which spread the ideas of health management system and prevention in Japan and European countries.

## The cognitive evolution from “Plague” to “Infectious Disease” Gao X

Hobson 1816—1873 , a medical missionary of the London Mission Society, was the first doctor to translate Western medicine into Chinese in modern times. Taking leprosy as an example, Angela Leung probed into the conceptual difference and mode of transmission of infectious disease between traditional Chinese culture and modern understanding.

## Chinese

He created a way to bring Western medicine knowledge into the framework of TCM, explaining Western medicine concepts of disease in terms familiar to the Chinese people.

## Langwen Ying Han shuang jie shang ye Ying yu ci dian = Longman English

At the early 20 th century, a mixture of plague and infectious disease was still visible in medical textbooks and the media.

## MDBG Chinese Dictionary

This is evident in the English—Chinese or Chinese—English dictionaries compiled by early missionaries to help foreigners to learn Chinese. Therefore, the limitations of Western translators in terms of professional knowledge structure and insight should not be ignored in the undergoing study about the spreading of Western medicine.
