## Cisco IE 2000U Switch Getting Started Guide

Vibrato Sensitivity Determines the intensity of the Vibrato effect. NOTE If you select an Audio Style as starting data, the Audio part will be used as is. .

## SunNet Manager SNMP Proxy Agents

Polling of the managed resource at the specified intervals is handled by the SNM proxy agent rather than the Nerve Center, minimizing network traffic and the polling work required of the MIS.

## System Security via OpenSCAP

NEXT PAGE Genos Reference Manual. If the proxy agent is sending a Set request, the proxy waits for the specified request timeout for a response before timing out.
