## Climate and environmental change in the Mediterranean

Applications are open until 8 June 2018 at 16:00 Brussels local time. This is also a region of constant change. We are already way further down the road than we should be.

## The Mediterranean Diet as an Example of Environmental Sustainability

This is welcome news across the Mediterranean, where climate change is driving temperatures to new extremes.

## Mediterranean climate

Today, populations in the wild have dwindled in some parts to below one individual per hectare. This pressure is further amplified by the development of tourism in highly attractive Mediterranean coastal areas, and rapidly evolving changes in consumption patterns, as a result of increasing development Plan Bleu 2012.

## Life and Environment in the Mediterranean

The restored lake plays a vital role in this wetland habitat. The shepherd could lead flocks from one patch of unused or unclaimed land to the next, following seasonal patterns of migration.

## Benefits of Living a Mediterranean Lifestyle

LIFE projects are using new technologies and digital platforms to help national authorities identify crimes and deter potential offenders. Since most parts of the Mediterranean climate border large water bodies, temperatures are average with a slight temperature range between winter low and summer high. Regions with this climate are influenced by the dry-summer trend that extends considerably poleward along the west coast of the Americas, as well as the moderating influences of high altitude and relative proximity to the Pacific Ocean.

## **Mediterranean marine life flourished during lockdown, Italian coastguard finds**

Economically, the region has a very strong dependence on mass tourism
