## South Yorkshire: Is Leeds in South Yorkshire? New cities in Tier 3

Model-based unemployed As unemployed form a small percentage of the population, the APS unemployed estimates within local authorities are based on very small samples so for many areas would be unreliable. To apply please download an application pack below or request one from the Sheffield and Rotherham Wildlife Trust Human Resources Department. The Special Workplace Statistics have been used to identify the changes over the period 1981-2001 Office for National Statistics, 1981a, 1991a, 2001a.

## Learning to work : The intermediate labour market response to social exclusion.

The overall proportion was similar in , at 6%. In less than two years it was built and the first slabs rolled on 10 June 1957, quite an achievement. We are always looking for passionate, dedicated and resourceful people to join us.

## All projects

To overcome this ONS has developed a statistical model that provides better estimates of total unemployed for unitary authorities and local authority districts unemployment estimates for counties are direct survey estimates. More information about the impact of the change in weighting on main LFS indicators published in October 2020 can be found in.

## Work For Us

In employment People who did some paid work in the reference week whether as an employee or self employed ; those who had a job that they were temporarily away from eg, on holiday ; those on government-supported training and employment programmes; and those doing unpaid family work. The problem for many regeneration areas is that investment has not been sustained beyond initial recruitment and retail employers have not provided sufficient support structures to secure long term benefits Escott, 2006.
