**Understanding Gregory Bateson**

I highly recommend this important and inspiring book. Gregory Bateson 1904—1980 , anthropologist, psychologist, systems thinker, student of animal communication, and insightful environmentalist, was one of the most important holistic thinkers of the twentieth century. Charlton focuses extensively on the Greenspirit movement, of which he himself is partaking and which is a form of ecological basic movement.

**'Understanding Gregory Bateson: mind, beauty and the sacred earth' by Noel Charlton**

Also timely and still very relevant as GB intelligently foresaw what we are ecologically, scientifically and aesthetically coming to face. Addendum: in the meantime I've read Small Arcs of Larger Circles: Framing through other patterns by Gregory's daughter Nora.

**Understanding Gregory Bateson: Mind, Beauty, and the Sacred Earth by Noel G. Charlton**

This book deserves a place alongside Lipset Gregory Bateson: The Legacy of a Scientist and Harries-Jones A Recursive Vision: Ecological Understanding and Gregory Bateson in any Bateson scholar's library.

**Understanding Gregory Bateson : mind, beauty, and the sacred earth**

This book is a wonderful introduction to the key ideas of this pioneer in systemic thinking.

**Understanding Gregory Bateson : mind, beauty, and the sacred earth**

Noel Charlton's book, both elegant and accessible, sheds new light on Bateson's revolutionary relevance to our time.
