Clinical Sports Nutrition

Australians Trent Watson and David Pyne contribute their expertise in the other two commentaries 'The science of antioxidants and exercise performance' and 'Nutrition for the athlete's immune system', both of which are emerging areas in sports nutrition research. Anyone who has previous editions will pick their way through the new one to find the differences and will find this a valuable addition to the bookcase. Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product.
