**Physical Chemistry**

High quality original papers in English dealing with experimental, theoretical and applied research related to physics and chemistry are welcomed. In general, the higher the barrier, the slower the reaction. At UWL, we live out the Wisconsin idea of public service and community engagement.

## Department of Chemistry and Biochemistry

Before that, we better know about the physical chemistry itself . We are proud to work with our many partners in La Crosse, giving back every day to a community that generously supports our teaching, learning and service mission.

A second is that most chemical reactions occur as a sequence of , each with its own transition state. Physical chemists work in a variety of different areas, but their common goal is to discover, test, and understand the fundamental physical characteristics of a material—be it solid, liquid, or gas.
