Behavioral Epigenetics: How Nurture Shapes Nature

He found it in the non-Euclidean geometry of 19th-century mathematician Georg F. It

Filesize: 44.59 MB

is in mom's interest to conserve resources and distribute them equally among her offspring, who may not all have the same father, by putting the brakes on genes that promote strong growth in any single embryo. He observed the truth about the world long before we were ready for it.

Math Patterns in Nature

African cichlid fish: a model system in adaptive radiation research.

DK Nature: Birds

What Galileo discovered and ensconced in this simple equation, one of the most consequential in scientific history, is that, when air resistance is left out, the distance in feet, d, that an object falls is equal to 16 times the square of the time in seconds, t. Environmental chemicals can also affect parenting and offspring behavior. Taking a broader look at your subject matter can be inspiring because of all the variety to be found in a single landscape.

Describing Nature With Math

It just amazes all of us that science is really everywhere and easy opportunities like making simple gelatin is a hands-on learning experience for both of us. Usually, in creating a picture, the dominant object, which is the center of interest, is established first-adding the horizon line and background detail lastly.
