## Bibliography...

As of July 12 the roster of Special Olympics football players included Nina Ackerman, Genevieve Burke, Ben Cartwright, Nelia Cullen, Jamie Embree, Nicholas Gosiewski, Michael Gosiewski, David Gurreri, Michael Havel, Connor Hayslip, Chris Horton, Savannah James, Cole Jeffries, Raina Kubinski, Rhylie Ludwig, Keagan Patterson, Adam Shaw, David Spurlock, Brennan Strobach, Allison Sweress and Nicholas Tomins; and cheerleaders included Barbara Bell, Sarah Faiman, Roxanne Fatemi, Madison Jacob, Noreen Kern and Sarah Platt. It is part of the required readings for engineers seeking a professional license in Canada and other countries. The RV Hakuhō Maru 1992 — RV Hakuhō Maru — The 3,987-ton Japanese research vessel Hakuhō Maru, an Ocean Research Institute - University of Tokyo sponsored ship, on cruise KH-92-5 cast three Sea-Bird SBE-9 ultra-deep conductivity-temperature-depth profilers in a transverse line across the Challenger Deep on 1 December 1992.

## At sea with the scientifics

The rate of descent and drift is not available, but the ROV bottomed to the east of the deepest waters of the eastern basin as revealed by the ship's maneuvering on 14 May. They believed that the conditions of constant cold temperature, darkness, and lack of currents, waves, or events provided such a stable environment that evolution would slow or stop entirely. Murray has combined with a careful examination of the soundings a constant use of the tow-net, usually at the surface, but also at depths of from ten to one hundred fathoms; and he finds the closest relation to exist between the surface fauna of any particular locality and the deposit which is taking place at the bottom.

## Challenger Deep

I know of at least one example of the medal with only the lines of longitude on the globe. We aborted the mission and came back and discussed it.

## Joseph Matkin

No ocean voyage had ever been so well documented. The CAIB concluded that NASA had failed to learn many of the lessons of Challenger. She returned in 1958, Cruise 27, to conduct a detailed single beam bathymetry survey involving over a dozen transects of the Deep, with extensive examination of the western basin and a quick peek into the eastern basin.

## **Challenger Deep**

The maximum depth recorded was 10,804 metres 35,446 ft location of depth is not available. Illustrations not seen by PW.

## **Space Shuttle Challenger disaster**

It is clear that the Special Olympic athletes cherish their moments on the field with the Hudson players, who behave like the role models all athletes should strive to be. There were letters and diaries written by members of the crew and some of these have been documented. In 1999, Kairei revisited the Challenger Deep during cruise KR99-06.

## **Matkin (Joseph) Papers**

During a televised hearing, Feynman demonstrated how the O-rings became less resilient and subject to seal failures at ice-cold temperatures by immersing a sample of the material in a glass of ice water. Handwritten note, Alexander Buchan Medal Click on image for larger view. Following the day of the accident, press interest remained high.
