Cognitive therapy vs. medications for depression: Treatment outcomes and neural mechanisms

Some members of the G-20—including new members brought into the discussion for the first time as the G-8 expanded to the G-20—like things the way they are; they like being in the inner circle and argue that enlarging it will only complicate matters.

Western Balkans Regular Economic Report Spring 2021

Greater African market integration is being pursued by the African Union in an effort to establish a Continental Free Trade Area CFTA by 2017 and integration of the Regional Economic Communities into a single customs union with a common currency, central bank, and parliament by 2028.

A Global Recovery for a Global Recession

In 2017, a provincial panel, the Advisory Panel on Coal Communities, examined the effects of the coal phase-out on workers and communities and released its recommendations for the provincial government Ibid. However, as implied by the title, the emphasis is on investments in schemes to enable growth in new and greener industries. Chapter I: Uncertainties surrounding the global economy and their implications for the global development agenda Chapter I, by José Antonio Ocampo, discusses the multitude of uncertainties that the global economy is facing, putting them in perspective with a historical account of key economic trends in the past decades.

Front Matter on JSTOR

A key area that the United Nations can support is the continued work with Governments in monitoring progress towards decoupling, which requires refining data collection mechanisms at all levels. The Saudi government has also begun to at least partially privatize Aramco, launching an IPO for the company in late 2019. The economic goal of immigration policy and any temporary worker program should be to meet the needs of

Recover better: Economic and social challenges and opportunities

Uprisings in Venezuela and the Future of Democracy The foundations of economic freedom in Venezuela have crumbled. As shown in the figure, acutely depressed individuals could be characterized by decreased prefrontal function, possibly arising in part from increased amygdala reactivity.

2014 Global Agenda for Economic Freedom

Resurrecting Privatization Even after almost three decades of privatization worldwide, the role of the state in many economies remains strong if not dominant. Research suggests that commissions are better placed to create the conditions for transformative policy change if they are tasked with outlining multiple policy pathways, including the challenges and opportunities of each.
