Exploring Food Science

Do you know what a geode is? The best thing about growing sugar crystals is that you can eat your experiment when you are done! Overview: Designed for middle school students, this experiment explores concepts like calories, the caloric value of different foods and the amount of calories children should consume in one day. For those of us that are privileged to have a choice of what we take into our bodies, we take this for granted.

10 Kitchen Science Experiments for Kids

Some suggestions teachers may give their students include food chain labels, pictures of animals within one food chain, or a food chain chart showing the progression from animal to animal. Different scientists doing pioneering work in food science are remembered.

Food Science Experiments

Even though lions don't eat grass, they wouldn't last long if there wasn't any grass because then the zebras wouldn't have anything to eat.

Science for Kids: Food Chain and Web

Fun Quotient: Pretty edible rocks inside non-pretty edible rocks. PDF file contains about 370 pages.

Grades 1 and 2

The book opens with a revised chapter on what food science actually is, detailing the progression of food science from beginning to future.

Elementary Food Science (Food Science Texts Series) 4th Edition by Ernest R. Vieira

This is a simple way to learn about the basic structures of animals cells.

Food Chain Lesson Plan, Animal Eating Habits, Worksheets, Elementary Science Teaching Activity

These food science activities are more than just fun, they are full of so many opportunities to learn about and explore science! Learn about fossils by creating your own in this edible dough. Once your experiment is over discuss whether or not they were right and why? Strawberries are an exceptional fruit to use for this lesson because each individual student is able to complete the process by themselves and strawberries yield more DNA than any other fruit i.

Food Chain Lesson Plan, Animal Eating Habits, Worksheets, Elementary Science Teaching Activity

These amazing models are a great way to teach kids about the different structures of the eye and skin. Learning about is in the center of the earth has never been so delicious! This another oxidation experiment that shows you how to bake secret messages! Print this lesson for this lesson plan.
