## Meanook (MEA) Magnetic Observatory

Building of the solar tower at the Meudon Observatory began in 1963; it was commissioned in 1969. Moreover, this misinterpretation may be justified by the similarity of spectra of sulfur emissions with spectra of mixed emissions of oxygen and nitrogen, as shown in Fig. Number of aurora candidates from MS versus the normalized moon phase.

## Resolutions

Private diaries and journals of meteorological information, 1792-1889. The observations also include records of temperature and humidity.

## Meanook (MEA) Magnetic Observatory

The National Physical Laboratory Teddington : W. Color online Change in the number of candidate sunspots and auroras during 1261—1644.

## Observatories In Canada

Especially some of the latter are consistent with nitrate signals preserved in ice cores. The newly elected President of the Commission for Aeronautical Meteorology and Assistant Director of Hong Kong Observatory, Mr.

## Magnetic observatories at the turn of the century: a forward look

Tri-daily weather maps, 1874-88 1,035 items. International Journal of Climatology, 35 7 , 1662—1681.

## Period structure of Pc3, 4 micropulsations

Gerdes, documenting his field survey work in the Florida Keys, the Gulf Coast, New England, and the Mississippi River Valley, 1844-69;

Stehman Forney, concerning surveying operations in the Gulf of Mexico, 1888-91; and in San Francisco W. Both of the peaks in the number of naked-eye sunspot data coincide with the periods of high solar activity level at the end of the 14th century and the early 17th century, which are just before the Spörer and the Maunder minima, respectively. At the same time, in order to accomplish this purpose, it was ordered to hand over all manuscripts of the Chronicles, kept in church and public libraries, under the control of the Commission ПСРЛ: I, p.

#### **DRAW Citizen Science, Historical Weather Data Rescue**

He wished to create a centre for the physical study of celestial objects, using the then emerging techniques of photography and spectroscopy.  
Бысть же того лѣта и мыгла велика поряду съ два мѣсяца и не видѣти было перед собою за двѣ сажени человѣка в лице. .
