USDA ERS

If a beet contains 18 per cent of solid substances, which 16 per cent, is sugar, then — — — — purity coefficient '88.

U.S. Sugar Industry

Sugarbeets need long days approximately 140 growing days with sunshine and abundant moisture during the season. Seedbed Preparation: Field selection and seedbed preparation are critical to establishment of the sugarbeet crop.

Records of the Bureau of Plant Industry, Soils, and Agricultural

A two-year project was undertaken to determine the feasibility of liming fresh sugar beet cossettes, prior to extraction, as a means of reducing energy consumption. These combinations increase the risk of sugarbeet injury.

Where is Sugar Produced?

With a Chapter on into5tacy. North Dakota State University and University of Minnesota Extension Services.
