AudiologyOnline Journal

Audiologists serve in a number of roles including clinician, therapist, teacher, consultant, researcher and administrator.

Audiology

Audiologists provide information on hearing and balance, hearing loss and disability, prevention of hearing loss, and treatment to business and industry. The document is not intended to be an exhaustive list of activities in which audiologists engage.

elicense

Audiologists assess and provide audiological treatment for persons with tinnitus using techniques that include, but are not limited to, biofeedback, masking, hearing aids, education, and counseling. Audiologists conduct otoscopic examinations, clean ear canals and remove cerumen, take ear canal impressions, select, fit, evaluate, and dispense hearing aids and other amplification systems. Counseling regarding hearing loss, the use of amplification systems, and strategies for improving speech recognition is within the expertise of the audiologist.

Scope of Practice

. Below are two sample e-learning sessions you can try out. The central focus of the profession of audiology is concerned with all auditory impairments and their relationship to disorders of communication.
