## ANE TODAY

The stadium had two long parallel sides and one rounded end with seating all around. With the accumulation of power, the games held at the Circus Massimo became more magnificent and elaborate. The inhabitants of Carthage were, apparently, fanatical about Roman circus and amphitheatre games.

## The Circus Maximus in Rome, the ancient roman stadium

This became so common that curse tablets were made to spook the opposing teams. For how races were actually conducted, we must turn to J. EŞİT OLMASIN DİYORSANIZ, KADINLA ERKEK, KARA ÇARŞAF GİRSİN DİYORSAIZ, YOBАЗIN GAZABINDAN ÜRKEREK.

## PROMETHEUS: Roman Circuses: Arenas for Chariot Racing and ASIA MİNOR

Are the investigations actually being carried on at the circus, or is it simply that the work of the torturers went on even during holidays? We hope to display the fragments of opus signum in the circus centre. The most recent excavations in the 2000s focused on rendering the site accessible, completing the dig, restoration, and new ramps in 2016. The hoarse roar from applauding partisans stirs the heart, and the contestants, both horses and men, are warmed by the race and chilled by fear.

## The Great Races: Ancient Circuses in Rome and Carthage

Each team had its own scouts for finding talented riders and horses, and each team was passionately supported.

## Circus Maximus

The seven eggs at this end of the spina have all been lowered, indicating that this is the final lap. Its use for chariot races is indicated both by its length and by the discovery of a concrete barrier about 200 m long running down the centre. Is there a similar commonality of interest between partner colors? Charioteers could switch teams, just as footballers are traded between teams today.
