The tests validated the feasibility of using a computer vision system to achieve accurate and objective color ratings of sweet cherry under outdoor natural light conditions for actual in-orchard use. Pre-harvest color rating of cherry is important to growers in determining the optimal harvest time.

### Optics in agriculture, forestry, and biological processing II (1996 edition)

Statement SPIE Publishers SPIE Classifications LC Classifications 1996 The Physical Object Pagination xvi, 125 p. And, therefore, they cannot, of themselves, give out and set up a sacrament.

### Optics in agriculture, forestry, and biological processing II [electronic resource] : 19

McLeod ed , New Delhi, pp. This system successfully used a camera flash to reduce the effects of two major obstacles in outdoor color rating: 1 inconsistent ambient light; and 2 glaring reflections on cherry skin. And next to none, perhaps, or none, who will not be.
