Taken from the efforts and research of experts from around the world, this manual will show you the ins and outs of growing Marijuana indoors. The natural plant processes slowly come to an end as the plant dries. As they continue to mature, they turn a translucent milky color and, finally, they turn amber.

Marijuana Horticulture Chapter 5: Harvest

If you want to grow potent, high yield weed - without wasting months of frustrating trial and error, keep reading. Latent nutrient accumulation in foliage imparts a fertilizer-like taste.

Marijuana Horticulture Chapter 5: Harvest

His expert advice has guided growers worldwide to apply simple, effective horticultural techniques to high-yield gardens.

Cultivation 101: Cannabis Horticulture

Seedlings need to receive about 16-18 hours of light for healthy, vigorous growth in the beginning stages of cannabis horticulture.

Download Indoor Marijuana Horticulture

Its ability to relax the mind of the user, tackle chronic pain, and its relatively low cost means that it is available to most. Removing leaves and large stems upon harvest speeds drying; however, moisture content within the dried buds, leaves and stems is uneven. Hanging plants is a labor-saving way to facilitate slow, even drying.

Indoor Marijuana Horticulture by Cervantes

More than 500,000 copies of the Indoor Bible are in print in Dutch, English, French, German and Spanish. .
