### What is SOS?

With continued warming, cold-related deaths are projected to decrease and heat-related deaths are projected to increase; in most regions, increases in heat-related deaths are expected to outpace reductions in cold-related deaths. In turn, this affects the well-being of the people who make their living supporting these economies, including rural, coastal, and Indigenous communities. Namely from science for its own sake towards science on agendas by and under the direction of Arctic residents themselves.
