Such information can assist policy makers in targeting their investments more effectively to reduce poverty.

Linkages between Fisheries, Poverty and Growth: India Case Study

Many surveys confirm that the population is convinced that the reforms have benefited mostly the rich while the rest still lack access to basic services.

CiteSeerX — Linkages between Government Spending, Growth, and Poverty in Rural India

The results imply that GINI and UNEMP are the main factors that increase CRIME, while trade liberalization policies have a supportive role to decrease crime rates across countries. Can one change an entire country? After the liberalisation of Indian economy in 1991, aquaculture really grew big as it became possible to import efficient farming technologies, feed and other essential ingredients⁷. Planning Commission 2005 : Government of India, 10th Mid-Term Appraisal, 2002-07.

However, variations in the magnitude of the effects are large among different types of spending and across regions.

Is Poverty Stochastic or Structural in Nature? Evidence from Rural India

The export of seafood from the country increased from 15 732 metric tonnes MT in 1961-62 to 343 041 MT in 1999-2000. In the second phase, which began in late- 1970s and continued up to late-1980s, growth and incomes went hand in hand and the fishers could earn very well — more than double their earnings from the previous period, and about 50-60 percent higher than they are today. In other words, these variables are also endogenous variables, and ignoring this characteristic leads to biased estimates of poverty effects.

Local government spending and multidimensional poverty in Senegal: insight from the fuzzy approach

Right now, rather than trying to radically alter local customs and disrupt wider social dynamics in India, policies should find a way to take them into account. Government spending on anti-poverty programmes has a poverty reduction impact but its impact is targeted and narrowly focused.

[PDF] Public Expenditure, Growth and Poverty Reduction in Rural Uganda

A more serious consequence of the failure of agriculture as a sustainable means of livelihood for the people has been the drastic increase in the number of suicides in the farming community NIRD, 2004. Thus, the study evaluated the question, i. The role of NGOs, fishworker organisations and other civil society organisations in policy- making remains low, despite the largely symbolic efforts to increase their involvement.
