## Energy politics and geopolitical competition in the Caspian Basin

It will help officials gain access to data, and insider knowledge, that so far have been largely shielded from public view. Europe initially seemed to be trending away from the right as the United States Government continued to be paralyzed by the competing factions of the governing Republican Party. Some developing nations are excluded from advanced energy know-how altogether, compromising the SDGs.

## The radical geopolitics of US foreign policy: the 2003 Iraq War

Seeking Energy Independence We all are aware that the United States imports some 57% of its oil supply and that we work to gain security of supply through diversity of supply.

## India and the geopolitics of technology Analysis

This is the case for many countries in the Middle East and north Africa which, despite the adoption of elaborate strategies for economic diversification, have not really made much progress in this direction. In an era of high uncertainty, scenario planning must be capabilities-based, which means that firms must be prepared for all possible outcomes and ensure that flexible strategies can be implemented across the spectrum of risks and futures.

## The radical geopolitics of US foreign policy: the 2003 Iraq War

Despite the growing populist backlash against globalization, the twenty-first century version remains alive and well. But if nuclear power is to be offered as an option to developing countries, then it must be maintained as an option for developed countries.

## India and the geopolitics of technology Analysis

In order, it is Canada, then Saudi Arabia, followed by Venezuela, then Mexico, then Nigeria. But fossil fuels remain dominant.

## **The Oil and Gas Industry in Energy Transitions**

The digitisation of electricity grids clearly presents security risks, as terrorist groups or hostile countries could seek to either enter the systems to extrapolate information, or to disrupt them to cause economic and social damages. It should be clear that there are a number of geoeconomic practitioners plying their trade i. China-based hackers lead the world in numbers of attacks against other nations, including against the United States, which is the most frequent target of internet attacks.

## **Energy and Geopolitics**

How might investors best navigate potentially conflicting positions between federal, provincial and municipal authorities? In , Kim Jong Un has consolidated his grip on power through patronage and fear and has doubled down on his nuclear and missile programs, developing long-range missiles that may soon endanger the continental USA. Sophisticated information technologies permit instantaneous communication among the far-flung operations of global enterprises. Now, the bespectacled 42-year-old, who worked with Clinton when she was secretary of State and during her failed 2016 presidential bid, is reentering the fight with.
