Gastroenterology and Hepatology covers all the major diseases of the gastrointestinal tract and liver, utilizing clinical epidemiology to present the strongest and most current evidence for interventions. Add to this the weight and expertise of its author team, led by Peter Cotton and Christopher Williams, and the final result is an essential tool for all gastroenterologists and endoscopists, particularly trainees looking to improve their endoscopic technique.

**9781405181938**

The only evidence-based resource combining gastroenterology and hepatology, this major textbook critically appraises the evidence for diagnosis, screening, and treatment of gastrointestinal and hepatic diseases, and provides clear recommendations for management. Provides more quick-reference algorithms that summarize clinical decision making and practical approaches to patient management.

## Gastroenterology/Hepatology

Access a broad range of topics that focus on all of today's most common GI and liver disorders and their management. Lindor, provides an in-depth, comprehensive look at the pathophysiology, diagnostic, and treatment information related to the liver.

## Gastroenterology/Hepatology

The text provides easy-to-assimilate information on each disorder and includes the key facts, concise, bulleted paragraphs, and a structure that lends itself to accessibility and point-of-care use in a busy clinical setting. Part 2 addresses specific diagnoses which can cause or be associated with dysphagia such as prematurity, velopharyngeal insufficiency, ankyloglossia, laryngeal clefts, laryngomalacia, vocal fold paralysis, and cricopharyngeal dysfunction. Based on these elements, the 12th edition was awarded first prize in the 2012 British Medical Association Book Awards in the Internal Medicine category.

## Evidence

Expert ConsultT eBook version included with purchase. Evidence-based

## **Gastroenterology/Hepatology**

### **Clinical Resources**

Focusing mainly on the rapidly changing and innovative medical and surgical strategies to manage the disease, new surgical procedures such as endoscopic biliary intervention and minimally invasive necrosectomy to exciting new medical therapies like Antiprotease, Lexipafant, probiotics and enzyme treatment are all discussed. Its orientation is mainly to adult medicine.

### **Evidence**

He holds cross-appointments in the Divisions of Internal Medicine, Clinical Pharmacology and Gastroenterology. It also discusses new information regarding reflexive interactions between the larynx and esophagus that potentially influence swallowing.
