Computer Technology, Special Needs Students, and the Inclusion Classroom

Also, the possibility to import and export data was implemented. For information about the lending program call 404-894-0541. Thanks Mathew for the interesting article.

Computer Accessibility

Input Students with hearing or speech impairments typically use a standard keyboard and mouse. We work cooperatively within the medical and technology professions. Voice output systems are also used by people with low vision.

Working Together: People with Disabilities and Computer Technology

With the right technology, educators can develop and manage compliant, high-quality special education documents using intuitive guided actions and business rules aligned with IDEA and other federal and state laws.

Accessibility for the Disabled: Computers and Software

Do you teach these technology skills to your students? They may partially or fully cover cost if the equipment is medically necessary. Still, people with disabilities face a variety of barriers to computer use. Using technical tools intended for human speech recognition and synthesizing, you can avoid the necessity to use paper and pen during the lessons.
