The uniqueness problem for the solution of nonlinear optimal control problems is analyzed in various settings.

Kolesnik G.V. Upravlenie proizvodstvennymi sistemami s raspredelennymi pravami sobstvennosti: Jekonomiko

The methods proposed by the author cover cases where the controlled system corresponds to well-posed or ill-posed boundary value problems, which can be linear or nonlinear. Bibliography Includes bibliographical references p. The book offers simple and clear exposition of main results in this area.
