Space bridge

Home in on a spatial position and momentum will fluctuate wildly to compensate; specify smaller, more precise quantities of time and energy will vacillate across a wider swath of improbable values. The universe as a whole is stuck in an eternal instant.

The Bridge From Nowhere

The entirety of 's population, save the , likewise escaped consumption thanks to their spacebridge. It was kind of an aesthetic choice by the architect.

Space bridge

. Newton founded dynamics on his three laws of motion. No one can say how that unlikely concentration of energy that, according to physicists, gave rise to a primordial explosion from which both space and matter developed, could have come into being in the first place.

Space bridge

. This soon ceased to be an issue, however, when the Decepticons headed off on an interplanetary energy raid; in order to slow the Autobots down, destroyed the Earth-based space bridge, causing a chain reaction that detonated the entire network. The other muscles, the eye, the brain and the other organs all produce weaker but measurable fields.
