Net premium valuation

Average annual earnings This method measures a practice based on the average net earnings available to the owners. Life insurance policy reserves are the money an insurance company must set aside today to pay expected future life insurance claims.

Actuarial Reserves

This method is often unreliable because it can undervalue older practices i. If the valuation basis assumes interest of say 3% and actual investment returns are 7%, then this will lead to a valuation surplus to declare bonuses.

A dentist's practical guide to dental practice valuation methods

It takes no account of the size of the actual premium payable or of future expenses. If the value is higher than the cost, then the investment opportunity needs to be considered. I will give you my 6-step process for quickly finding a great business idea.
