in order to protect the infant's spine from damage.

## PHYSIOTHERAPY IN PAEDIATRICS

About the subgroup The purpose of the International Organisation of Physical Therapists in Paediatrics is to provide a means by which World Physiotherapy member organisations with a common interest in children and their families may meet, confer, and promote these interests.

## PHYSIOTHERAPY IN PAEDIATRICS

However, no evidence was found to suggest that the distribution of responsibility influenced adherence. Consideration of these differences between infant, child and adult and careful analysis of the available mucus clearance techniques allows tailoring of an individualized therapeutic approach to the paediatric patient.

Pediatric physiotherapists treat children with neurological or developmental problems.

**International Organisation of Physical Therapists in Paediatrics (IOPTP)**

It is good value for money.

**Physiotherapy for airway clearance in paediatrics**

Physiotherapy for Children Having your child diagnosed with a musculoskeletal, biomechanical or developmental problem can be very distressing; however, Paediatric Physiotherapists can achieve good results with a wide range of conditions experienced by children from birth to eighteen years. Waiting times for some problems can be up to 12 months. Paediatric physiotherapy is for children under 16 years of age with a range of musculoskeletal and neuro-orthopaedic conditions.
