GIS can prove to be effective tool for planning and decision making for any dairy industry. I also need to be able to save distances or dimension to different places with annotation.

Designed Maps: A Sourcebook for GIS Users by Cynthia A. Brewer

In general, open source software gets closest to what users want because those users can have a hand in making it so. Diva GIS also delivers useful, every day for your mapping needs. Urban Planning: GIS technology is used to analyze the urban growth and its direction of expansion, and to find suitable sites for further urban development.

EPA Geospatial Applications

Using GIS I would like to create maps of the woodland including the locations of individual tree species,their health,ground type,animal holes etc, so that I can make informed decisions on sustainable forest management.
