Burial History

Steady-state exhumation pattern in the Central Andes — SE Peru 307 EMMEL , B. Nuclear Tracks and Radiation Measurement, 17, 207—214.

Burial History

In anticipation of this potential, the two software modules have been written for Sun Microsystems JavaTM technology to maximize their implementation across all major computer platforms. A common legend, however attractive intuitively, results in data products that work well for one region but show insufficient or excessive detail elsewhere. The model was calibrated with historic shoreline change data for one time period 1979-2002 , and validated with a later time period 2002-2007.

In: D ORE′ , A. This process may be influenced by the predicted decreased of salinity in Arctic seas, increased storm activity, coastal erosion, ocean acidification, decline of Arctic ice, etc. The count data and track density are shown at the bottom, and these can be adjusted manually if required to correct for any counting errors.

Burial History

We consider that the pit-area method should work effectively for even higher track densities, probably up to 108 tracks cm22, which will be discussed elsewhere in a later paper. Also indirect human impacts such as land-uses changes through time eg. Deconvolving these different controls

has been the focus of AFT and AHe studies.
