Complex fragment coupling by crotylation: a powerful tool for polyketide natural product synthesis

XX is the XXth reference in the list of references. Stoichiometric experiment In order to gain deeper insight into a possible reaction mechanism, stoichiometric experiments were conducted in C 6D 6. After complexation with a chiral diamine, the 2-substituted- cis-crotylsilanes may be employed in highly diastereoselective Sc OTf 3-catalyzed aldehdye crotylation reactions.
